One easy way to protect wildlife is learning about endangered animals that live 37 you. Teach your friends and family members about the wonderful birds, fish, and 38 that live near your home. In this way, they are going to be more 39 about nature. You can also visit a national wildlife museum or park. These places give good information about how to protect endangered animals and their homes. You can do 40 work in these places to help animals and their babies.

\* بخش درک مطلب (Reading Comprehension)

ح: متن زیر را به دقت بخوانید و پاسخ هر سوال را به شکل خواسته شده ارائه دهید. ( ۲ نمره)

Microbes are really wonderful. They are everywhere! They live all around you, on you and inside you! Microbes are very small, so you can't see them. But don't worry. Some microbes make you sick but most others keep you healthy and even help you to fight disease.

There are so many different types of microbes. We still don't really know how many there are, but we know that microbes do lots of different things. Bacteria and viruses are two important types of microbes. Viruses are smaller than bacteria. They cannot live on their own. They need to be inside a living cell to live and grow but bacteria can live in any area of the earth.

- 41- Bacteria are bigger than viruses.                      a) True                      b) False  
42- There are only two types of microbes.                      a) True                      b) False  
43- Why can't we see microbes?  
44- Where do viruses live and grow?
