Children are taught to respect elders by their parents at very young ages. Throughout school and university, they are reminded of them while their personalities develop. But still, we often forget to respect our elders. Respecting elders should come from within. Respecting come under good habits and manners. Everyone welcomes "well-behaved person. As we all know, history repeats itself. If we respect our elders today, we will get respect when we grow old.

There are many ways to show respect to elders. For example, they feel happy and honored when we include them in the decision making of the family. They are more experienced than us and they also have walked the same path before us. So, we should always ask of their advice.

Another way is listening to **them** and following their customs which they have lived up to.

We should also **repeatedly** visit them and invite them to our house, too. We should often sit and eat with them. All this will help us to recognize and appreciate elders. Always remember that people are always judged by their actions and each word or action has a reaction. So, if you want to succeed and be happy in life start respecting elders by being polite. Finally, I would like to say, our elders are really worthy and we should respect them.

Although you might not like ants when they get in your food or get into your home, ants are interesting tiny insects and do help the Environment. They are advanced social-insects because they live in highly organized large colonies where each group has complicated important relationships with many others. The queen ant has wings and its primary function is to lay eggs. The other female ants are called workers. They build the anthill, find food and even act as soldiers. The soldier ants protect the queen, defend the colony and attack enemy colonies in search of food.

Ants don't have ears. Ants hear by feeling vibration in the ground through their feet. They carry things 20 times heavier than their own body weight. The muscle arrangement in an ant gives it great Strength allowing it to carry heavy things toward the entry point of the anthill. Their colonies can contain millions of ants. Solar energy is the most effective of all energy resources and it can even be available in cloudy weather. The solar energy which comes to the Earth is about 10,000 times greater than the amount which humankind consumes. Solar technologies can deliver heat, cooling, natural lighting, electricity, and fuels. Solar technologies convert sun light into electrical energy through solar panels or mirrors. Although not all countries use solar energy, it is possible for every country.

The cost of producing solar panels has surprisingly decreased in the last few years, making them not only in access but often the cheapest form of electricity. Depending on the type of material used in their production, solar panels can work for around 30 years.

Sleep is essential for all people. Did you know that sleep is more important than food? A person, who does not sleep, dies at a younger age than one who does not eat. Let's say you sleep 12 hours later than you usually do. It will take your body about three weeks to return to normal. We spend about one-third (1/3) of our lives in sleep. That's about 121 days a year!

How much sleep do we require? We are all different. A baby needs 16 hours of sleep every day. Children 6 to 12 years old need an average of 10 to 12 hours of sleep. A teenager needs 9 to 10 hours, and an adult needs an average of 7 to 8 hours of sleep a night. Of course, some people need only 3 hours of sleep each night. Others need 10 hours of sleep. After age 50, the average sleep time goes down to 6.5 hours a night. We need less sleep as we get older.

Many countries have used the energy in moving water for thousands of years. And today, it's still a powerful resource that can generate clean, renewable, and cheap electricity. They produce energy from running water and convert it to electricity. The power that is produced as a result of falling or running water is called "hydroelectric power" or "hydropower". Turbines and generators convert this power into electricity.

Today, about 19% of all our electricity is generated from hydropower, making it one of the largest sources of renewable power. So what makes hydropower renewable? It's simple: water. Water is converted into clouds and recycles back to earth as rain. This process is called "The Water Cycle". The water cycle is continuously recharging and can be used to produce electricity along the way.

Energy is the ability to do work. It can take a variety of forms: mechanical, electrical, chemical, and nuclear. To produce any type of energy, the resources of the earth are used. The main resources of the earth are fossil fuels such as natural gas, oil, and coal.

We get most of our energy from these fossil fuels, but this is harmful to the environment. Fossil fuels are nonrenewable and cannot be replaced easily. Once we use them up, they're gone forever. They are not clean as they pollute water or air.

In recent years, scientists try to use other types of energy resources. They call them clean energy resources because they do not pollute the earth. Clean energy is renewable. It is made from resources that can be replaced, like wind, water, sunshine, tides, and plants.

The most common type of clean energy is the solar power. Solar energy is produced by the radiation that reaches the earth. People have used the sun as a heat source for thousands of years. Iranians, for instance, use special designs and arrangements of windows, balconies and yards to get the most sunshine. Different types of materials might also be used in building the houses. Many countries now think that cars that burn fossil fuels should be replaced by electric cars. Electric cars don't burn gasoline in the engine, so they don't pollute the air. They use electricity stored on the car in batteries.

Sometimes, 12 or 24 batteries, or more, are needed to power the car. Just like a remote-controlled car, an electric car has an electric motor that turns the wheels and a battery to run the motor. Electricity, the same energy that lights your lamps and runs your TV, is stored in batteries on an electric car. The batteries can be like the batteries you find in flashlights or in regular gasoline cars. To get the battery ready to roll, you have to charge it. This process isn't much different from the way you charge the portable devices you carry around every day: your cell phone, MP3 player, or digital camera. The difference is that you deal with a much bigger gadget that carries you around instead.

36. According to the passage, many countries think that cars that use fossil fuels should be replaced by electric cars. a) True b) False

It is very important for us to respect our elders. It is also important to note that elders were not born elders; they were kids like us and now have grown old. A few years hence we will also grow older. If today we respect them, our present and future generations will carry those values and will learn to respect us as well when we grow old.

Elders have a lot to share with us: their life experiences, their failures, their successes and many more. Thus, we need to care for them because they deserve to be cared for. Respect and care for elders start with our parents, as they are our first teachers in our life. No matter what we do in our lives, who we are, and where we live, we must love them as they love us unconditionally. They feel honored when we appreciate their love and respect them.

For many people, their teenage years – from 13 to 19 – are sometimes the best or worst years of their lives. Sometimes some teenagers feel that there are many differences between them and their parents. Teenagers often want to show that what they do is correct. They want to wear different clothes to show that they are free. In some countries, they can drive when they are only 16. Many young people work at part – time jobs after school and on weekends, so they can buy their own cars. After finishing high school, some of them live in their own apartments. Still teenagers must know that their parents have a lot to share with them: their life experiences, their failures, their successes. They should respect and care for their parents as parents are the best support in their lives.

44. According to the passage, teenagers are between thirteen and nineteen years old. a) True b) False
45. Teenagers at the age 16 can drive in all countries. a) True b) False
46. The passage says that parents have a lot to share with.....
a) people b) high schools c) teenagers d) adults

For English teachers, a dictionary is essential for any teaching program and needs to be used carefully. A dictionary is the basic thing for any language class. The most important thing that a student should know is how to use it. A student needs to have at least three dictionaries available to learn English properly. The first one should be a bilingual dictionary that covers words in the native language as well as in English. The second one should be a monolingual dictionary that gives word information in English. The third one should be a native language dictionary.

When teaching begins, learners will use a bilingual dictionary for simple translations. Monolingual dictionaries are also necessary pieces of language learning studies, because they provide learners with definitions, pronunciations, etc. The problem becomes hard with studies when the students do not fully understand the words they are translating, and they get confused. Teachers know that they should clear up the confusion quickly before they jump into to the next lesson. When the students enter a more advanced level, they must have a native language dictionary that relates to their own language. When they do not understand the meaning of a translated word in their own native language, they can use this dictionary to figure it out.

40. A dictionary is the basic thing for any language class. a) True b) False
 41. Students must have more than four dictionaries to learn English a) True b) False
 42. What is the main idea of the text?
 a) Dictionaries are essential for language learning.
 b) Bilingual dictionaries are the most important types of dictionaries.
 c) All of the students cannot figure out what they read.
 d) Monolingual dictionaries are the most expensive dictionaries.
 43. What does the underlined word "they" in paragraph 2 refer to?
 a) problems b) teachers c) dictionaries d) students
 44. When should teachers clear up students' confusion?
 45. What must the students have when they enter a more advanced level

Pablo Picasso was a distinguished artist. He was born in Spain on October 25, 1881. His father was a painter and art teacher. He helped his son to improve his artistic ability. When Picasso was 10 years old, his family move to Barcelona, Spain where Picasso took an exam to attend a popular Art School. The exam was going to take one month, however it was very surprising that Picasso finished it in one day.

A few years later, he went to another school in Madrid. He was bored with the old Teachings of Art School, and he did not want to paint like people hundreds of years ago. He really wanted to create something new. He moved to Paris where he worked as an artist and created his wonderful drawings. During this time, he created his famous Blue period works. In 1907, Picasso painted a painting that is known as the first painting in the modern art movement. Artists from all over the world travelled there to see this painting.

In 1907, Picasso began to experiment with a new style of painting. He is well-known for creating the Cubism Style. Respect is a way of acting well or thinking highly about something or someone. You respect those who are important to you. You show your respect by being polite and kind. When you are impolite or act badly toward people, they may feel sad or angry. But whom should you respect the most?

You must care for those who always care for you. You know that your parents care for you for every little thing. You must love them, respect them, and care for them. Besides bringing you into the world, your parents spend their time, energy, and strength to make sure that you have what you need or want. Telling them that you thank them reflects the level of your respect for them.

The easiest way to show your love and respect is to tell them that you appreciate who they are and what they do. You can also do something small but meaningful, for example, wash the dishes, clean the kitchen after dinner or clean the rooms. Your parents will pay attention to and appreciate your acts of kindness. You may also tell your mom how well she cooks, or tell your dad how great he is at his job. For most of parents, any of these small things can be a sign of respect.

33. We respect those who are important to us for some reasons. a) True b) False
34. If you are impolite or act badly toward people, they feel important. a) True b) False
35. We show our.....by being polite to those we care for.
a) need b) strength c) happiness d) respect
36. Telling your parents that you thank them the level of your respect for them.
a) reflects b) invents c) imagines d) shouts
37. What is the easiest way to show your love and respect to your parents?
38. Can doing good small things show your respect to your parents? (Give an example)

When early humans hunted and collected food, they could not control their environment. They could live in their environment like other animals. When humans learned to make fire, however, they became skillful at changing their environment. To provide themselves with fuel they cut trees and made fires. Parts of forests were changed to lands to increase the growth of grass and to provide a greater area for the animals that humans ate as their food. This improvement ended in farming and also keeping animals as sources of human food. Fire also provided the means for cooking plants which were not used before. After meeting the simple need for food, early humans began to follow other goals such as founding the cities and living in larger groups.

39. Early humans killed the animals and ate them as their food. a) True b) False
40. Early humans discovered how to make fire. a) True b) False
41. What does "they" in line 3 refer to? a) environments b) humans c) fires d) animals
42. What is this passage mostly about? It is about.....
a) how animals were hunted

There are many languages in the world, some of which may seem harder to learn for second or foreign learners. But which is the most difficult language to learn? Well, it's not easy to reply because there are many factors to discuss.

A native speaker of French, for example, will find English easier to learn than Chinese, because English is very similar to French, while Chinese is very different. As a result, first Language can affect learning a second language. The greater the differences between the second language and the first, the harder it will be to learn. Many people answer that Chinese is the hardest language to learn, possibly influenced by the thought of learning the Chinese writing system. Besides, the pronunciation of Chinese does appear to be very difficult for many foreign learners. However, for Japanese speakers, who already use Chinese letters in their own language, learning writing will be less difficult than for speakers of languages using the Roman alphabet.

Teachers and the conditions in which the language is learned also play an important role, as well as each learner's motivation for learning. If people learn a language because they need to use it for a living, they often learn it faster than people who study a language that has no direct use in their day to day life.

35. The word "it" in paragraph 2 line 4 refers to..... .
 a) learning first language b) second language
 b) difference of languages d) Chinese language
36. Hardness of learning a language can depend on..... .
 a) how different it is from one's mother tongue c) whether it is French or English
 b) whether you are learning Japanese or Chinese d) how long it takes to master pronunciation
37. Being familiar with writing system of the second language makes it harder to learn.
 a) true b) False
38. The reason behind learning a language can slow down or speed up learning.
 a) True b) False
39. Which language is easier for French people to learn, English or Chinese? Why?
40. Why does a Japanese speaker find the Chinese writing system less difficult?

The research for new sources of energy has led into various ways. To produce any type of energy, the resources of the earth are used. The main resources of the earth are fossil fuels such as natural gas, oil and coal. Electricity is generated from coal, oil and natural gas, but the process has been proven to be expensive.

Experimental works are in progress to produce energy from other resources. Scientists and experts spared no pains to search for new ways of producing new source of energy. For instance, electricity has been produced with giant wind turbines. Geothermal power or the heat from the earth is also being tested to produce energy. Many societies are burning rubbish and other biological waste products to generate electricity. Not only changing unwanted products to gas or oil is a cheap way to produce energy, but also it is an effective way to get rid of waste.

Some experts expect service companies to expand hydroelectric power generated from streams and rivers. As an example, 50 years ago hydroelectric power provided one-third of the electricity used in the United States but today it includes only 4%. The oceans are another possible source of energy. Scientists are studying ways to change the energy of oceans' tides and waves into electricity. Experiments are also underway to make use of temperature differences in ocean water to produce energy.

Clean energy resources are vastly respected, valued, and used all over the world to keep the environment clean. As a result, scientists try to introduce new types of energy resources called clean energy resources to nations of the world.

41. Which is the best title for this passage?
 a) The use of waste products for energy c) The search for new sources of energy
 b) Effective ways of producing hydropower d) New discoveries in geothermal power
42. Which of the following is not offered in the passage as a source of energy?
 a) Electrical power b) Clean energy
 c) Nuclear energy d) Hydroelectric power
43. Changing waste products to gas or oil is an expensive way to generate energy, but it is very effective.
 a) True b) False
44. Geothermal power is the heat from the Earth. a) True b) False

45. What is hydroelectric power produced from?
46. What will happen if the nations of the world use clean sources of energy?

Albert Einstein, a physicist, was born on March 14, 1879, in Germany. He could change people's understanding of the physical world, therefore, he has been considered as one of the greatest thinkers in science. After graduating in 1900, Einstein had a hard time finding a job. He finally got a job at the Swiss Patent Office in 1902. This job gave him the time to do some of his important works like writing theoretic papers on physics, especially his Theory of Relativity.

He became a professor at the German University in Prague. He began working at the Prussian Academy of Sciences in Berlin in 1914, and soon finished his work on his General Theory of Relativity, which was published in 1916. Einstein was awarded the Nobel Prize for physics in 1921. In 1933, he left Germany because of the strict rules of Hitler. He went to work at the Institute of Advanced Study at Princeton University in New Jersey. He later became a U.S citizen. During World War II, he wrote a letter to President Roosevelt expressing his worry about the atomic bomb.

After stopping his work in the institute in 1945, he spent much of his time giving lectures and speeches and working on theories. In his final years, he lost his health. He was hospitalized with stomach pains several times, and he died on April 18, 1955.

35. Before the World War II, Einstein left Germany and became a/an.....
a) President b) American citizen c) physicist d) student
36. He died because of his
a) Relativity Theory b) scientific research c) health problems d) academic studies
37. His job helped him to think about his theory. a) True b) False
38. He found a job easily after graduation. a) True b) False
39. When was the Nobel Prize awarded to Einstein?
40. What did Einstein do for expressing his fear of the atomic bomb?

All of our energy comes from the sun which is our nearest star. The sun sends out huge amounts of energy through its rays every day. We call this energy solar energy or radiant energy. Life on earth would not exist without the sun because our planet would become totally frozen. We use this solar energy in many different ways. The sunlight lets us see and warms us. Plants use light from the sun

to grow and they store it as chemical energy. This process is called Photosynthesis. The energy is stored in their roots, fruits, and leaves. This energy feeds every living thing on the earth. When we eat plants and the food made from plants, the energy is stored in our bodies especially in our muscles and brain cells. We use this energy for everything we do. We use energy when we sing a song, think a thought, tell a joke or climb mountains. Everything needs energy.

Just as humans store energy in their bodies, the earth stores the sun's energy too. The sun's energy has also been stored in coal, oil, and natural gases which are known as fossil fuels. We may use the energy in these fossil fuels to make electricity. We light and heat our homes, schools, and offices and also run our computers by electricity. Our cars and planes run on gasoline which comes from oil. Fossil fuels are known as non-renewable sources of energy, so they can't be used over and over again. This means that one day they will run out!

Luckily, there are some renewable energy sources we can use, and we can keep using. Unlike non-renewable fossil fuels, they will not run out. Three forms of renewable energy are: solar energy, water energy and wind energy. Solar energy can be caught through solar panels. People put solar panels on the top of houses to help capture the sun's energy and transform it into heat and electricity. Water is also used to produce electricity. Wind is a third form of renewable energy. Wind turbines can get the energy of the moving air and turn it into electricity. All these renewable energy sources are essential for us because they will not run out, so we need to get better and better at using them.

41. What does "they" in paragraph 3, line 2 refer to?
 a. fossil fuels b) non-renewable energy sources
 c. renewable sources of energy d) solar panels
42. What is this passage mostly about? It is about-----.
 a. how long it takes for light to reach the earth from the sun
 b. the importance of energy for human life and where energy comes from
 c. different types of non-renewable sources of energy used by people
 d. how fossil fuels were formed
43. Our nearest star is the source of all the energy we need on earth. a) True b) False
44. The sun's energy can only be stored in the form of coal, oil, and natural gases.
 a) True b) False
45. Where is energy stored in plants?
46. What are the three forms of renewable energy?

Many countries now think that cars that burn fossil fuels should be replaced by electric cars. Electric cars don't burn gasoline in the engine, so they don't make the air dirty and unclean. They use electricity stored on the car in batteries.

The electric car is usually plugged in at night. The car can be plugged into a special charging unit even at houses. Some electric cars can be plugged right into a regular electrical wall outlet. Others need a larger outlet, like the kind that a stove or a vacuum cleaner plugs into. The engineers are trying to make better batteries that hold more energy and last longer. To overcome the problem of charging electric cars, hybrid cars are also available. Hybrid cars combine the benefits of gasoline engines and electric motors. They can be designed to meet different goals, such as better fuel economy or more power.

48. Why don't electric cars make the air dirty and unclean?
49. When is usually the electric car plugged in?
50. Why do people use hybrid cars?
51. Electric cars use both fossil fuel and electricity. a. True b. False
52. Not all electric cars have batteries. a. True b. False

The size and shape of your ears show your character more than any other part of the face. Other parts of the face change shapes as we get older, but ears do not change their shapes. They only change in size. Reading people's character from their ears is a very old science. In the past people thought that person's ears with color were dangerous. They also thought that the shape of the ears showed if a person was musical or not. Today, too many people believe that the size and shape of the ears help you know if a person is musical. Ears are all different, and each different thing has meaning. Next time you look at a person, see if his or her ears are large, medium-size, or small. Look at the lobes (گوش درمه). Ears that are always red mean that a person may get angry easily. Ears that are always cold and nearly white color mean that a person has a nervous character.

53. When we grow up, _____.

- a. our ears will not change in size c. our ears will get colder
b. our ears will be the same size. d. our ears will not change in shape.
54. If someone's ears are red, it means _____.
a. he/she is a kind person b. he/she is very happy
c. he/she may get angry easily d. he/she drinks a lot
55. If you look at someone's ears, the right way is to see _____.
a. his face, ears and nose b. the size, color and shape
c. his mouth, eyes and nose d. the hair, eyes and color
56. How can we find out a person has a nervous character through his/her ears?
a. When they are cold c. When they are not white color
b. When they are medium-size d. When they are musical

Suppose that you have a very small vocabulary. Also suppose that you don't know how to get the meanings of new words. When you come across an unfamiliar word, that word may stop your understanding of the passage. Your eyes pause too long on the word as you try to get its meaning. You go back and read the word again, try to get its meaning from the context. As a result, you read much more slowly than you should, and you find that the difficult word is a wall to your comprehension. Suppose that you know many words and you are skilled in finding the meanings of new words. Your eyes move quickly and you read rapidly. You comprehend what you are reading. If you have a good vocabulary, you are more interested in reading.

48. What may happen when you come across an unfamiliar word?
49. How does having a good vocabulary influence your reading habit?
50. What is the closest synonym for the word "suppose"?
a. believe b. accept c. understand d. imagine
51. Unknown words in a passage may make comprehension easier. a. True b. False
52. The meaning of a new word may be guessed from the text. a. True b. False

What do people need to light their homes and drive cars? Energy!
Energy gives power to many things we need and use. Most of the energy people use comes from coal, oil, and gas. They are called fossil fuels. Those fuels come from fossils under the ground. Fossils are the remains of plants and animals that lived long ago. Burning fossil fuels pollutes the air. The air becomes dirty. That can be harmful to people, animals, and plants. Now more people are using clean energy. Such energy does not pollute the air. Two kinds of clean energy are wind power and solar power.

Solar power: The sun gives Earth heat and light. Some homes have solar panels on the roof. The panels collect sun light and turn it into electricity. That is a kind of energy. It lets people do many things. For example, we use electricity to light our homes and watch television. Solar power can also be used to warm up the water in our homes.

Wind power: People can turn wind energy into electricity. Wind turbines are machines that *spin* when the wind blows. They make electricity.

53. Where does most of the energy that people use come from?
a. the wind b. plants c. fossil fuels d. the sun
54. What are two examples of clean energy?
a. solar power and electricity b. wind power and solar power
c. fossil fuels and wind power d. electricity and fossil fuels
55. What is the main goal of using clean energy?
a. to replace the sun and wind with man-made energy sources
c. to stop destroying fossils from long ago
b. to remove pollution from the air as quickly as possible

- d. to create electricity without creating pollution
56. What is the closest synonym for the word "spin"?
- a. turn b. run c. fly d. climb

Some people prefer to provide help and support directly to those in need. However, others prefer to give money to national and international charity organizations. Giving money to that in need can be a personally good experience, but there is a choice between donating nationally and internationally through charities or giving directly to those around you. One of the advantages of providing direct support is that you can know exactly how your money is spent. Another benefit is that you can see the impacts on those you are helping, which can lead not only to great personal happiness but also to respect from others who appreciate the work you do. There are advantages in giving to charities that are national and international. First and the best is helping in problems of global importance, such as curing diseases and human rights or helping those who are in bad environmental events like earthquakes and floods. In conclusion a person should make their own choice in helping others. The important point is that we continue to give to those who are more in need than ourselves.

48. What can it lead to when you see the impacts on those you are helping?
49. What is the important point in helping others?
50. What is the closest synonym for the word "benefit"?
- a. experience b. advantage c. choice d. effect
51. Helping people in bad environmental events has the global importance. a. True b. False
52. All people feel great personal happiness when they help others. a. True b. False

A dictionary is a collection of words ranging from letters A-Z. When reading or writing a story, an essay, a paragraph or even a sentence, using a dictionary is a great help. There are many advantages of using a dictionary. So, using a dictionary is important for students. The first advantage of using a dictionary is pronunciation. We can also listen to the pronunciation of the words if we use an audio dictionary. The second advantage of using a dictionary is checking out a word's right spelling. The third advantage of using it is learning a word's part of speech. It is one of the types into which words are divided in grammar according to their use, such as noun, verb, or adjective. Lastly, example sentences are mostly available. Seeing specific words used in a sentence can provide more context and help you better understand proper usage. However, searching words by using a dictionary takes a lot of time. By using a talking dictionary, we are able to look the words up in a few minutes. As a result, a dictionary is a great help for everyone, especially students who are learning a language and who are interested in language learning.

53. How can a talking dictionary help us?
54. What is the use of example sentences?
55. When is a dictionary a great help for us?
56. What does the pronoun (it) in line 7 refer to?
- a. pronunciation b. spelling c. part of speech d. example sentence
57. What is the opposite of the underlined word "available" ?
- a. out of reach b. valuable c. repetitive d. accessible
58. Learning a word's part of speech helps us better understand proper usage of it.
- a. True b. False
